

Dear Chairman Powell,

As a citizen of the United States, I oppose the the step of giving the media the ability of owning all outlets in a local area. The experience I am having with Clear Channel Communications has really made me think that one media company owning my television channels can not possibliy be good. There is no diversity and different points of view. It will no longer be a news source but a source of entertainment to sell the advertising to consumers. The cable networks are already doing this, that is enough, do not make it worse by letting 5 media companies break into the local markets too.

Sincerely,

Melody Cannon
